

League Over-Subscription Policy – 2015 Update

This policy defines how GCC handles situations where the number of registrations for a league exceed the league's capacity.

Each league may have its own policy. The policy will be posted to the GCC website at least one week before registration opens for that league. If a league doesn't have an over-subscription policy, it will use the general policy specified below.

General Policy

League Capacity

A league's capacity is defined as the number of people who can play each week at the league's regularly scheduled draw times, plus 1 additional team's-worth of players per draw. A typical 2 draw league can accommodate 80 people on the ice each week, plus 2 additional teams for a total capacity of 88.

Priority Registration

Anyone who registers at least 2 weeks before the first draw time of the first league of the season, or by a date chosen by the board will receive priority registration. Registrations will be accepted but league spots will not be awarded until the priority registration period is over. Once the period is over, league spots will be awarded in the following priority order:

1. Members who were registered in the league during the previous season
2. Returning club members
3. New club members

The order within each category will be determined by a random lottery. True mixed leagues will consider men and women separately in order to create balanced teams.

General Registration

The general registration period begins after priority registration closes. During the general registration period league spots will be awarded based on registration time and date.

For both registration periods, an individual will be considered registered once a registration form has been received by the club, and all club membership and league fees are paid in full, or the member has had a payment plan approved by GCC.

League Policies

Monday Open

The Monday Open league will use the general policy except that league capacity is 100.

Tuesday Super, Thursday Men and Thursday Mixed Doubles

Tuesday Super, Thursday Men and Thursday Mixed Doubles will use the general policy except registration will be based on teams. Individuals will declare a team when registering for the league. The individuals on a team will be considered fully registered when all members of the team have registered.

If a team is fully registered before the priority deadline, it will get a priority ranking based on points:

- 2 points for each member who was registered in the league in the previous season
- 1 point for returning club members

Team slots will then be awarded to the teams with the most points with ties broken by random lottery.
